Emails

Jan Overgoor

degree distributions of emails (power law?)

```
## [1] "(plfit) Warning : finite-size bias may be present"
## [1] "plfit:  alpha=2.441  xmin=437"
## [1] "(plfit) Warning : finite-size bias may be present"
## [1] "plfit:  alpha=3.521  xmin=453"
```

cdf – Outgoing Emails

xmin=437

alpha=2.441

(log) Number of People

(log) Number of Emails Sent

cdf – Incoming Emails

xmin=453

alpha=3.52

(log) Number of People

(log) Number of Emails Received
